## Aniket Deepak Kamble

has successfully completed the online, non-credit Professional Certificate

# IBM Java Developer

Individuals who have completed this professional certificate have the skills to build and deploy Java applications using frameworks like Spring. They can integrate front-end technologies such as HTML, CSS, and JavaScript with Java back-end frameworks to create dynamic web and enterprise applications. They have leveraged Cloud, Docker containers, and microservices architectures for scalable solutions. They've used tools like Git and GitHub for version control and collaboration and developed applications with relational and NoSQL database backends. Additionally, individuals have also demonstrated their expertise through real-world-inspired projects and created a shareable portfolio to showcase their skills to prospective employers.

Ramanujam Srinivasan

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
